SUMMARY

Senior Data Engineer with 6+ years building and owning business-critical data infrastructure and terabyte-scale ELT pipelines. Expert-level SQL and Python proficiency combined with strong software engineering fundamentals (CI/CD, testing, design patterns). Proven track record designing data platforms that balance pragmatic implementation with reliability and SLA attainment. Ready to drive Dagster and AWS adoption.

PROFESSIONAL EXPERIENCE

Vinted GmbH

Berlin, Germany / Vilnius, Lithuania | Aug 2023 – Present

Senior Analytics Engineer, Shipping Finance

- Own end-to-end business-critical ELT pipelines in dbt and BigQuery serving Finance Ops and Group Reporting; architected layered data quality framework (dbt tests, reconciliations, anomaly detection), metadata cataloging (OpenMetadata), and observability (freshness, completeness, volume/metric drift) ensuring SLA attainment and incident detection within 4 hours.
- Optimised BigQuery workloads and storage patterns using expert SQL and Python—reduced pipeline runtimes 75% and compute costs 15% while maintaining SLAs for €40m in terabyte-scale data exposure; applied pragmatic performance tuning (partitioning, clustering, materialized views) balancing speed and maintainability.
- Designed and embedded risk-based control framework into core datasets, reducing data misstatement risk by 90% on executive reporting pipelines (€40m exposure) and enabling reliable, auditable month-end close; implemented reconciliations and variance alerts preventing revenue recognition errors.
- Applied software engineering best practices to data work: version control, automated testing, CI/CD pipelines (GitHub Actions), code review processes—enabling reliable scaling, knowledge transfer, and onboarding of new team members without single-person dependencies.
- Partnered with Finance to translate requirements into documented metrics, data models, and SLA definitions; designed data architecture supporting metric evolution without breaking downstream analytics or executive reports.

Tourlane GmbH

Berlin, Germany | Jul 2022 – Aug 2023

Data Analyst, Finance Lead

- Built and owned centralised ELT pipeline in dbt and Snowflake, integrating Salesforce, Stripe, Twilio, and backend systems for business-critical finance and operational analytics; hardened pipelines through automated testing, monitoring (freshness, completeness checks), and alerting—raising SLA attainment from 88% to 97% and reducing incident response time by 60%.
- Applied pragmatic implementation judgment: deprioritised perfection in favour of monitoring and rapid incident resolution, enabling 5 FTE day reduction in month-end close cycle time while maintaining data reliability and supporting Finance stakeholder confidence.
- Partnered with data engineering and Finance teams to design modular, testable data models; improved pipeline stability through systematic identification and resolution of upstream data quality issues from source systems.

LucaNet AG

Singapore / Paris, France | Mar 2020 – Mar 2022

Senior Finance Transformation Consultant

- Led 11 enterprise data platform and consolidation projects across APAC for listed companies (SGX, HKEX, KLSE, ASX); designed centralised reporting infrastructure serving executive and regulatory decision-making, achieving 50% reduction in reporting cycle times and improving close timeliness.
- Translated complex finance and consolidation requirements into scalable data models and automated workflows; architected solutions supporting 200+ reporting entities with consistent, auditable data lineage.

EDUCATION

École Supérieure de Commerce de Paris (ESCP) Business School

Paris and Berlin | Sep 2021 – Dec 2022

MSc, Big Data and Business Analytics (Mention Très Bien)

- Graduated as Valedictorian; awarded French Excellence Master Scholarship.
- Best Thesis Award: Large-scale NLP analysis of sustainability reporting data.

Nanyang Technological University (NTU)

Singapore | Aug 2016 – Jul 2019

Bachelor of Accountancy (Highest Distinction)

- Dean's List; recipient of Isetan Foundation and TFI-LeaRN Programme scholarships.

COMMUNITY AND VOLUNTEERING

ReDI School of Digital Integration

Berlin, Germany | Mar 2023 – Jun 2025

Instructor, Python and Data Analytics

- Designed and delivered Python curriculum to 60+ students; deep expertise in core programming and data engineering fundamentals.

SKILLS

Programming and Data Engineering: Python, SQL, dbt, Apache Airflow

Data Warehousing and Databases: Google BigQuery, Snowflake

Data Quality and Observability: dbt tests, Elementary, Anomaly Detection, OpenMetadata

DevOps and CI/CD: GitHub Actions, Git, Docker

Analytics and Visualisation: Looker, Tableau, Power BI

Certifications: Chartered Global Management Accountant (CGMA) · Microsoft Certified: Data Analyst Associate

Languages: English (Native / C2), Mandarin (B2), Cantonese (B2), German (A1), French (A1)
