- Designed layered data quality controls — dbt tests, reconciliations, anomaly detection — cutting misstatement risk by 90% on €40m.
- Raised dbt unit test coverage from <1% to 50%+ in four weeks using agentic AI for test data generation; authored a reusable testing guide that teammates independently adopted across the domain.

- Partner with Finance and Business Stakeholders to translate plain-language requirements into documented metrics and data models, enabling self-service analytics and smoother change management.
