PROFESSIONAL EXPERIENCE

Vinted GmbH

Berlin, Germany / Vilnius, Lithuania | Aug 2023 – Mar 2026

Senior Analytics Engineer, Shipping Finance

- Designed layered data quality controls — dbt tests, reconciliations, anomaly detection — reducing risk by 90% on €40m of exposure.
- Embedded a risk-based control framework into core datasets, detecting carrier billing discrepancies and recovering €1.6m in overcharges.
- Own end-to-end data pipelines and data models in dbt and BigQuery, used as single source of truth by Finance Ops and Group Reporting.
- Optimised ETL/ELT processes and BigQuery workloads: 75% faster pipeline runtimes, 1.5TB/day fewer queries, and 15% lower compute costs through incremental model redesign — without breaking SLAs.
- Built and redesigned invoice completeness alerting, delivering faster, more actionable signals for Finance and cutting time-to-detect.
- Partner with Finance to translate plain-language requirements into documented metrics and data models, enabling self-serve analysis.
- Raised dbt unit test coverage from <1% to 50%+ in four weeks; authored a reusable testing guide that teammates independently adopted.
- Presented analytics testing strategy at Forward Data Conference (Paris, Nov 2025) and Data Maker's Fest (Porto, Portugal, May 2026).
