

Chia, Jeremy

Analytics Engineer, Vinted Go

Manager: Georgi Evlogiev (10689)

Evaluated By: Jurgita Sakalytė (12996)

Q4/Annual 2023 Impact Reflection

Organization: Georgi Evlogiev (10689)

Location: DE Berlin

01.01.2023 - 31.12.2023

Historical Quarterly Impact Reflection Questions

For the quarter, WHAT are the top 2-3 ways you created impact?

Manager Evaluation

Response:

Employee Evaluation

Response: The overall theme of Q4 was enablement. In this quarter, I enabled further analysis by launching new dimensions. These pertain primarily to High-Value Fashion user dimensions. Some examples include the user recency and frequency dimensions (Looker dashboard) which allows Vinted's marketing strategy team to make data-driven decisions on how to craft their marketing campaigns and who to segment them for. Given the urgency and potential of value that can be created through Vinted's high -value fashion efforts, having visibility is important. This is especially so given that we had no prior visibility over this information. In addition, I paid attention to how users might use this information and ensured that documentation was available for these dimensions in Looker, such that the definitions and potential use cases are more obvious to stakeholders. I am also, at the point of writing, rolling out models for comparing actual versus targeted performance in the High-Value Fashion (conceptual document) segment. The first iteration is expected to be completed by the end of the quarter. This allows marketplace strategy, and group finance performance teams to have a consolidated view of this segment's performance in an automated way, reducing the time needed for them to consolidate this information manually. Having this overview will allow all stakeholders involved to more timely triage performance issues which arise in this High-Value Fashion, and react to performance changes quantitatively. Consideration was given to how other users might want to use component data as well when modelling, such that other analysts can build on the intermediary models to do their further

analysis. Optimal modelling practices were also adopted (e.g. taking information from the most upstream table) such that the addition of a new model job would not jeopardise the ability of the new model to meet the Service-Level Agreements for our nightly pipeline to complete before 8 am. In addition to these, I continued to support other Growth DSA members in rolling out "warehouse jobs" and providing code reviews for Looker and warehouse jobs pull requests. For example, I supported another team member in rolling out the referrals dimension (GitHub PR) and providing inputs on what the process might have looked like. I also provided inputs to LookML PRs to improve documentation (GitHub PR) and front-end user experience. These large teams continue to enable other teams in Vinted to continue delivering on DSA's mission to make data obvious, as well as the broader mission of encouraging behaviours that make second-hand first choice.

For the quarter, WHAT are the top 2-3 ways this team member created impact?

Manager Evaluation

Response: Jeremy's key responsibilities this quarter included: Data Warehouse (DWH) Changes Oversight for Growth DSA: Jeremy was responsible for reviewing and approving the majority of DWH changes related to Growth DSA. His role involved scrutinizing pull requests, assessing the logic and efficiency of the changes. Adjustment of Input Calculations for Growth Metrics: While Domain DecS integrated Growth metrics into the experimentation tool, Jeremy refined the input calculations within the DWH to enhance metric calculation efficiency in experimentation processes. Participation in the Optimisation Sprint: Jeremy contributed to the optimisation of HVF performance Looker dashboard during the Optimisation sprint. He played a pivotal role in developing and implementing the CatalogsDimension table, which replaced the core table for improved efficiency. He has shared insights and learnings of optimisation sprint with Growth DSA, which was very valuable session for all. AE for HVF: As the AE for HVF, Jeremy ensured that all HVF data

Employee Evaluation

Response:

requirements were accurately reflected in the DWH. He independently gathered inputs from stakeholders and effectively communicated changes. His ongoing support for stakeholders involved adjusting priorities as needed. Notably, Jeremy's communication skills were highlighted as clear and complete. Support for Referral DWH Creation: Jeremy provided assistance to Dovile in the development of the Referral DWH.

For the quarter, WHAT are the 1-2 things you missed having the impact you intended?

Manager Evaluation

Response:

Employee Evaluation

Response: I intended to deliver solutions in terms of being able to implement the updated retention framework update. However, due to other competing priorities and the need for this to be rolled out, it was taken over by another team member. Nevertheless, this still provided a good learning experience for members of the team to learn how such a requirement which involves backfilling and statistical distributions can be implemented (GitHub PR).

For the quarter, WHAT are the 1-2 things the team member missed having the impact you expected?

Manager Evaluation

Response: A recent consideration for improvement involved evaluating whether the initial VHF listing dimensions should be based on global_user_id or on a combination of portal and user_id before starting development. This step could have prevented the creation of technical debt. Furthermore, while Jeremy's proactive stance in data analysis is greatly appreciated, it's crucial for him to align his activities with the immediate needs of the project. This approach will help avoid engaging in work that may later be deemed unnecessary or redundant.

Employee Evaluation

Response:

Share 1-2 ways on HOW you demonstrated the Vinted values in the way you created impact (If needed, refer to the Career Level Framework for how these may look for your level)?

Manager Evaluation

Response:

Employee Evaluation

Response: This quarter featured co-creation. There were requests which were coming from

different teams about high-value fashion (marketplace strategy, marketing strategy, Growth) which necessitated the refinement of ideas, clarification of requirements, and formulation of potential ideas as well.

Share 1-2 ways on HOW this team member demonstrated the Vinted values in the way they created impact (refer to the Career Level Framework for how these may look for the person's level)?

Manager Evaluation

Response: We Grow: Jeremy's rapid growth in his role is attributed to his fast learning and attention to detail. He has enhanced his skills by completing courses in Scala and Airflow and attending the dbt conference. His smooth onboarding process paved the way for his quick transition to working independently, showcasing his ability to adapt and evolve in his position. We Co-Create: Jeremy exhibits a balanced approach to problem-solving, knowing when to tackle challenges on his own and when to seek support. His patience and eagerness to share knowledge contribute significantly to team dynamics. His respectful attitude towards differing viewpoints nurtures a collaborative environment. Jeremy's contributions, especially the valuable insights shared during Growth DSA meetings, have been instrumental in enhancing team learning and collective growth.

Employee Evaluation

Response:

Looking forward, share 1-2 ways you would like to improve in HOW you embody the values (refer to the Career Level Framework as needed)?

Manager Evaluation

Response:

Employee Evaluation

Response: I would like to focus on "We Grow". I am keen to explore new ways of working and learning new tools and methods to get the work done in a more efficient and optimal matter.

Looking forward, share 1-2 ways you would like to see the team member improve in HOW they embody the values (as needed, refer to the Career Level Framework)?

Manager Evaluation

Response: We Take Ownership: Looking ahead, I envision you taking on an even more autonomous role, where you manage your

Employee Evaluation

Response:

own roadmap and proactively identify priorities. This skill is already within your repertoire, and I encourage you to consistently apply it in your daily tasks. Your ability to self-direct and independently strategize is a valuable asset, and I urge you to fully embrace and utilize this capability in your work.

How has your ability to demonstrate Vinted's values while creating impact developed over the past year?

Manager Evaluation

Response:

Employee Evaluation

Response:

How has this team member's ability to demonstrate Vinted's values while creating impact developed over the past year?

Manager Evaluation

Response:

Employee Evaluation

Response:

Based on what was agreed throughout the quarter, summarise the Impact you had OVERALL?

Manager Evaluation

Response:

Employee Evaluation

Response: This quarter saw a shift in priorities due to incoming requirements. I, together with the team, adapted to those requirements and managed to deliver on the changes requested. It was a quarter where we delivered on the ability to view new pieces of information.

Based on what was agreed throughout the quarter, summarise the Impact the team member had OVERALL?

Manager Evaluation

Response: Jeremy's primary responsibilities this quarter included acting as an AE for HVF, overseeing Data Warehouse changes for Growth DSA, contributing to the Optimisation Sprint and assisting in the development of the Referral DWH. He demonstrated rapid growth through fast learning, skill enhancement, and a smooth transition to independent work. However, there is room for improvement and he is encouraged to manage his own roadmap and prioritize tasks more autonomously.

Employee Evaluation

Response:

Annual WHAT: Looking back over the year, please describe the key ways you created impact this year, and where you missed having the impact you intended.

Manager Evaluation	Employee Evaluation
Response:	Response: I created impact through enablement. Many of the projects, and refinements, which I worked on were based on exposing new information to stakeholders and ensuring that the definitions were clear. Some examples include high-value fashion, email verification, and referrals re-activation. I supported the domain's DSA team through timely peer reviews. In the coming year, I would like to create more impact in optimisation. This includes being able to make jobs more efficient, to refactor, and to implement good engineering practices in our code base.

Annual WHAT: Looking back over the year, please describe WHAT were the key ways the team member created impact.

Manager Evaluation	Employee Evaluation
Response: Successful. In his initial quarter at Vinted, Jeremy quickly onboarded to the data stack, infrastructure, and processes, contributing to projects like the Email Verification Dates Investigation and HVF dimensions, where he displayed strong independence, stakeholder management, and the ability to minimize legal risks. He also contributed to maintaining high-quality data changes in the Growth Domain by actively reviewing peers' PRs and updating documentation. In the following quarter, his primary responsibilities expanded to include refining input calculations for Growth metrics, participating in the Optimisation Sprint and fully supporting HVF initiative with data needs. Jeremy's role was marked by effective communication, independent stakeholder engagement, and prioritizing tasks according to changing needs.	Response:

Annual HOW: Looking back over the year, please describe how you embodied Vinted values, and where you were challenged.

Manager Evaluation	Employee Evaluation
Response:	Response: In 2023, I enjoyed working with different stakeholders. Many tasks required

collaboration and seeking out different perspectives, embodying "We Co-create". Many of the features that were rolled out took into consideration feedback from different departments. While doing so, I was sensitive to the needs and environments of other teammates, and "We care" was well exhibited. I would like to focus on "We Aim High" in the coming year - where I would like to push the boundaries of what is possible to create, to deliver novel and innovative solutions to solve issues. I would like to challenge assumptions and deliver data products which are well-aligned with business needs.

Annual HOW: Looking back over the year, please describe how the team member embodied Vinted values when creating Impact?

Manager Evaluation

Response: Successful. Jeremy is great at his stakeholder management skills and independence, quickly taking on projects and managing stakeholders on his own. He is recognized as an approachable team player who actively contributes to group activities, making tasks like prioritisation exercises easier for others. Jeremy's rapid growth is highlighted, stemming from his quick learning, attention to detail, and skill enhancement through various courses and conferences. His ability to co-create is also noted, with a balanced problem-solving approach, willingness to share knowledge, and respect for different viewpoints, all contributing to a collaborative and dynamic team environment. Looking ahead, Jeremy is encouraged to take on a more autonomous role by managing his roadmap, proactively identifying priorities, and consistently applying his ability to self-direct and independently strategize.
