Historical Quarterly Impact Reflection Questions

For the quarter, WHAT are the top 2-3 ways you created impact?

Manager Evaluation

Response:

Employee Evaluation

Response: This quarter focused on model creation, optimisation, and documentation. New models were created to analyse information relating to a programme's component - Offline Verification / Moderation. This required understanding the item flow through different stakeholders, and was possible because of the extensive understanding Laurynas had and his assistance. Together, we created a model OnlineModerationItemDimension to better analyse information relating to items which go through online moderation. The High-Value Fashion aggregates helped to improve dashboard performance, allowing for stakeholders to access this information faster and reducing computational costs on loading the dashboard queries. Together with Esmee's help in revising the dashboards, these aggregates reduced the query time on the dashboard from 2 minutes to 0.18 seconds (as of February 2024). Making programs' data more obvious was done through a Miro board, to consolidate the knowledge on the definitions of terms within programs' context and what the item process flow would be, and what attributes are being captured.

For the quarter, WHAT are the top 2-3 ways this team member created impact?

Manager Evaluation

Response: as shared by Jurgita: For this quarter Jeremy has supported the HVF program. The support included: Creating weekly targets from monthly targets for various HVF metrics. Combining actuals and targets of various HVF metrics (creating weekly

Employee Evaluation

Response:

aggregates and aggregating that to weekly and monthly). Making sure that VC data is available in a convenient format for stakeholders. Creating HVF dimensions needed for HVF retention calculations. Creating online moderation data and making sure that format is clear and easy to use. All were very high priority tasks, as everything was an input for HVF performance tracking. Also retention metrics are used in financial planning.

For the quarter, WHAT are the 1-2 things you missed having the impact you intended?

Manager Evaluation

Response:

Employee Evaluation

Response: I would have liked to be able to roll out more models and features to analyse new programs and initiatives which were being rolled out in the programs domain. There were times it felt like there was a heavy backlog while I was unable to react quickly enough to changes. This can be better managed with understanding the priorities and assessing the overall importance to the domain's OKRs.

For the quarter, WHAT are the 1-2 things the team member missed having the impact you expected?

Manager Evaluation

Response: as shared by Jurgita: There were significantly more things on the table for AE, but the amount that Jeremy managed to deliver is way over expectations for this short amount of time. On the things that Jeremy worked on, there were a few hiccups (ex. Weekly data targets kept changing slightly with each run), but due to limited time that could be spent on this, I think that Jeremy delivered well. For the future I would (if that could be the case) suggest Jeremy to commit to less things for the quarter to make sure that there is additional time in case something goes not according to the plan.

Employee Evaluation

Response:

Share 1-2 ways on HOW you demonstrated the Vinted values in the way you created impact (If needed, refer to the Career Level Framework for how these may look for your level)?

Manager Evaluation

Response:

Employee Evaluation

Response: We aim high: One of the tasks undertaken this quarter was revising the logic for

distributing monthly targets into weekly targets for comparing actual versus targeted performance. This required looking at existing logic and adapting it into Scala for better readability and visibility. Together with a teammate, Esmee, we examined the way the weekly targets were being normalised to give a better assessment of the segment's (High-Value Fashion) performance. We co-create: Many of the achievements made in Q1 2024 were done so with the help of the HVF team - Esmee, Jurgita, Laurynas. Collaboration with them made achieving the progress we made possible.

Share 1-2 ways on HOW this team member demonstrated the Vinted values in the way they created impact (refer to the Career Level Framework for how these may look for the person's level)?

Manager Evaluation

Response: as shared by Jurgita: Jeremy is very collaborative, as the majority of his projects were done with another DSA or other stakeholder. It is easy to work with him, as he quickly responds and supports whatever the support is needed. Jeremy also aims high and it is very easy to understand the code that is written by Jeremy. He includes the right amount of documentation. And adding to whatever was initially done by Jeremy is easy, as the delivery has good structure, right amount of details. This quarter Jeremy also took care of his roadmap and that went well.

Employee Evaluation

Response:

Looking forward, share 1-2 ways you would like to improve in HOW you embody the values (refer to the Career Level Framework as needed)?

Manager Evaluation

Response:

Employee Evaluation

Response: We take ownership: I would like to continue to increase my autonomy at work, and contribute to the team by planning my own roadmap in consultation with my stakeholders to achieve the OKRs they had set out.

Looking forward, share 1-2 ways you would like to see the team member improve in HOW they embody the values (as needed, refer to the Career Level Framework)?

Manager Evaluation

Employee Evaluation

Response: as shared by Jurgita:No specific improvements.

Response:

Based on what was agreed throughout the quarter, summarise the Impact you had OVERALL?

Manager Evaluation

Response:

Employee Evaluation

Response: This quarter as about capacity building for HVF - created the needed the dimensions and aggregates to enable other stakeholders to have clarity and do analysis on this topic.

Based on what was agreed throughout the quarter, summarise the Impact the team member had OVERALL?

Manager Evaluation

Response: as shared by Jurgita:-

Employee Evaluation

Response:
