Reflection Question 1

Please provide 2-3 examples of the impact created *this quarter*.

- What was achieved?
- What was missed?
- How did the actions align with Vinted's values?

Manager Evaluation

Response: **What was achieved?**
You drove and mostly yourself implemented the revised invoice validation tests. A few things stood out in this initiative:
1. You were proactive (already working on a design before it became a major painpoint — granted, it was flagged as a risk area in the Q4 retro, but it wasn't yet prioritised by either of the finance teams)
2. You aimed high (did not shy away from a complete makeover of *how* we test; not just thinking about marginal improvements) —

Employee Evaluation

Response: This quarter featured impact in improved visibility for stakeholders and cost savings through refactoring. I had also adapted to Despite being a shorter quarter, there were some good results.

1 - "Invoice Completeness and Uniqueness Alerts V2.0" was conceptualised and implemented in this quarter. We (DSA) successfully pre-empted a risk area and deployed a solution quickly.

you recognised that the problem is rather systemic and needs a systematic solution, which led you to a completely overhauled design

3. You co-created well with the platform team — with the migration to the new Scheduler, a different orchestration method became feasible and you adapted your design to make that work — resulting in a simplified overall infrastructure setup

Also, you mostly coordinated the migration of the Finance models and tests and DAGs galore to the new Scheduler. This required quite a bit of time as there were many "custom" [from the perspective of the new Scheduler] DAGs that needed addressing. You made reasonable tradeoff decisions when migrating (i.e. when we could switch to a built-in pipeline, when to push back and request more custom functionality).

You resolved the Homerr reporting challenges quickly and transparently. This problem came up while you were away, and Justina and I didn't have the confidence to address it. Once you were back, you quickly identified a potential solution, validated the results and rolled it out.

You took full ownership of the Vintern pipeline, preparing a well-structured homework (incorporating lots of feedback, and iterating on it until it was polished enough), reviewed CVs and coordinated with the TA team.

What was missed?

Only limited progress was made on cost-related topics in the project, as well as on pipeline performance. As a result, the Finance project was 'in the red' the majority of the quarter budget-wise, and was the worst-performing area in Vinted Go SLO-wise.

That being said, you made good prioritisation tradeoffs, ensuring you spent enough time on the Scheduler migration and ad-hoc problems (i.e. Homerr reporting) which ended up eating up some of the time planned for performance/cost optimisation.

How did the actions align with Vinted's

It was initially flagged as a potential improvement from last year's workshops, as the current alerts were not obvious. The FinOps team had also, in March 2025, identified it as a risk area which they had initially wanted to propose for DSA to focus on in Q2 2025. The development of this new solution was well-timed such that we could try-out, and implement it quickly, as DSA was already pro-actively looking for solutions before our stakeholders had raised an issue. Stakeholder feedback was positive thus far. Users were happy with new alerts, which made errors obvious and taking accounts easier. Here, we aimed high (for a solution which was obvious) and co-created (on how the alerts should look like).

The eventual implementation was also simplified - making it easier to maintain and also using existing infrastructure. Initially, it was meant to be implemented with a Pub/Sub Trigger. However, in consideration of the new Scheduler initiative, there was an opportunity to deploy this using the scheduler, which made the infrastructural set-up easier. This reduced the need for the Data Platform team's intervention.

2 - With Justina, VGo Finance has switched everything over to the Composer. With the instance turned off, VGo saves 1.2k EUR per month collectively. Pushing through with the migration of dependences, universal Airflow pipelines, and the test configurations. There were minor details to be worked out, and we co-created with the platform team to successfully see through with the migration of all pipelines. We had also adjusted some pipeline frequencies to reduce the costs.

In addition, there were reporting tasks - migration of Homerr and changing of mappings, revision of granularity of carrier invoice totals (to include routes) to improve the speed for reporting, to shorten the Month-End Closing time.

I would have liked to focus more on cost optimisation tasks as well as deprecating the remaining on-premise jobs, however there were some blockers (non-responsive stakeholders) and there were other priorities.

values?

In particular, you aimed high (Invoice validation upgrades) and co-created (Scheduler, Vinternship tasks).

I will push harder for this in Q2.

Reflection Question 2 & 3

How were the insights from feedback and learning applied *this quarter*?

Manager Evaluation

Response: In previous quarters and in our annual reflection, I had shared feedback that you need to start spending a bit more time thinking about the long-term of the finance projects, in particular when it comes to scalability and cost. While you made progress in 'upgrading' some capabilities (invoice validation) this quarter, there wasn't other significant progress made in this regard. As per the reflection, this was not entirely in your control, but is something you should keep high on your list.

Employee Evaluation

Response: The feedback received from the implementation of the Invoice Completeness and Uniqueness Alerts was a useful indication of what was important to stakeholders. It is useful to double-down on making alerts more obvious and easier to interpret.

Looking ahead, what actions would enhance the impact in the upcoming quarter?

Manager Evaluation

Response: Make sure to stay on top of your goals for the quarter, and (de-) prioritise things accordingly (i.e. ad-hocs, nice-to-haves etc.).

Employee Evaluation

Response: To be more proactive in engaging stakeholders, and persistent in getting follow-ups, to achieve the objectives (for example, in deprecation of old tables) for the quarter. Consulting more with stakeholders to understand their needs, and to pre-empt issues.

Set new Individual Goals

Automating data quality triage and responses

- Shipment join failures: Automating reports to assess the issues with shipment join failures. Currently, these still have to be run manually

Due Date: 30.06.2025

Status: On Track

Impact Goals

Cost optimisation of VGo Finance

- Propose and start implementing incremental models for main tables in finance - invoice rows, shipment legs cost and revenue.

- Implement required partition filters on bigger tables (incl. communication)

Due Date: 30.06.2025 Status: On Track Completion Date:
Category: Impact Goals

Preparation for VIntern to Join (Q3 2025 - 3 Jul 2025)

- Calibrate, align, review, interview VIntern to hire one VIntern
- Finalise projects for VIntern to work on

Due Date: 30.06.2025 Status: On Track Completion Date:

Inconsistent Impact Flagging

For this quarter, was the team member's impact in line with expectations for their role and Quarterly goals?

Your answer will be visible to your team member once you submit the form, please plan the timing of the form submission and discussion accordingly.

You can click on "Save for later" below to save your draft without sharing visibility to your team member. It is recommended to communicate an Inconsistent Impact Flag during the one-to-one discussion.

Please note that flagging someone as inconsistent is a proactive step to highlight areas where they should course-correct. It's a reminder for leaders to provide additional support to help the team member work towards becoming impactful next quarter.

No automatic processes are initiated from this flag; it is solely for awareness, visibility, and alignment purposes between the team member and the team lead.

Manager Evaluation

Rating: In line with expectations

Response:
