SUMMARY

Senior Analytics Engineer with 6+ years building scalable data platforms in dbt and BigQuery, specializing in data quality controls, comprehensive testing, and metrics definition that drive reliable analytics at scale. Proven ability to architect dbt models, automate testing and deployment workflows, and implement monitoring and governance frameworks that enable cross-functional teams. Deep expertise in testing strategies and reliability engineering, combining technical rigor with clear communication across analysts, data scientists, and business stakeholders.

PROFESSIONAL EXPERIENCE

Vinted GmbH

Berlin, Germany / Vilnius, Lithuania | Aug 2023 – Present

Senior Analytics Engineer, Shipping Finance

- Architect and maintain end-to-end dbt models in BigQuery, defining documented metrics and semantic models across finance and operations domains to power reliable analytics for 40+ downstream stakeholders.
- Implemented GitHub Actions to automate dbt testing, documentation generation, and deployment; raised unit test coverage from <1% to 50%+ in four weeks and authored testing and version control best practices independently adopted by teammates.
- Developed custom dbt macros for data quality checks and reconciliations, designing comprehensive test suite (anomaly detection, referential integrity) reducing misstatement risk by 90% on €40m of exposure.
- Built end-to-end monitoring and observability including redesigned alerting for data completeness and freshness, enabling faster issue detection while maintaining SLAs across all pipelines.
- Optimised BigQuery and Spark workloads through incremental model redesign, cutting pipeline runtimes by 75%, reducing daily query volume by 1.5TB, and delivering 15% compute savings while maintaining SLAs.
- Partner with analysts, data scientists, and business stakeholders to translate requirements into documented metrics and semantic models, enabling self-serve analysis and smooth change management when logic evolves.

Tourlane GmbH

Berlin, Germany | Jul 2022 – Aug 2023
